## THE IMPORTANCE OF WEATHER ROUTING IN

### Estimated Time of Arrival (ETA) prediction

#### PRECISION IN ETA — THE PNS ADVANTAGE

At Prime Navigation Shipping, we know that arrival timing is critical to effective maritime operations. That's why our **Weather Routing Centre (WRC)** delivers highly accurate **Estimated Time of Arrival (ETA)** predictions — helping clients optimize planning, port readiness, and voyage efficiency.

From Start of Sea Passage (SOSP) to End of Sea Passage (EOSP), empowering Owners and Masters with the information they need to make smarter, safer decisions.

1. **Real-Time Vessel Monitoring** - continuous tracking for transparency.
2. **Weather Routing** - adjusting for conditions to avoid delays.
3. **Route Optimization** - enhancing efficiency with performance-based adjustments.
